FFAs Suite

2. The Market Watch Form

- This form automatically opens up when you first start
 the application. You can select any contract to display
 on this form. Right Click on the header of the table and
 you will be presented with options to add or remove
 presentable contracts.
- From this selection you can also opt to increase or decrease the size of the display font, in order to make the form better readable according to your preferences.
- Prices appearing in <u>Green</u> signify a traded price higher than yesterday's closing level. <u>Red</u> signifies a traded price less than yesterday's closing level. <u>Blue</u> signifies a price not yet traded but representative of today's activity actual price levels. Prices appearing in <u>Black</u> signify yesterday's closing levels with no trades so far for this session.
- When a fresh traded price is reported it flashes on the screen for about two seconds. Additionally a message at the right lower corner on your screen announces the trade, much like when you are receiving a new email message. You can opt to turn off this feature by altering the respective entry in the Settings menu, reachable through the Select Tool general button menu on the main form.
- By right clicking on any price field inside the table grid you can select to display a graph of a particular contract displayed on screen. Additional information regarding most recent trades for this contract is also displayed.
- The Graph Contract selection opens up a new form on your desktop with the daily price evolution of the selected contract. Information for the displayed contract appears at the caption of the form, for example C4TC Q2-13. Positioning the mouse over any point on the price line displays the date and the respective closing level of this contract on this day.
